Education

Indira Gandhi College of Arts and Science Kochi, Kerala

Bachelor of Science in Computer Science *Expected Graduation Year*

- **Leadership:** Lead Organizer for a 24-hour undergraduate campus hackathon (March 2026).

Experience

Infocyle July 2026 – Present

Chief Technology Officer & Co-Founder *Kochi, Kerala*

- Direct the technical strategy, architecture, and product roadmap for an educational technology startup.
- Architected and developed **Vectra Labs**, the core web-based LMS, handling database schemas, backend API routing, and frontend component design.
- Authored formal technical incubation proposals and curriculum structures for institutional review.
- Designed a 5-day syllabus to teach practical AI tools and generative workflows to beginners.

Freelance Full-Stack Developer Oct. 2025 – Present

Software Engineer *Kochi, Kerala*

- Engineer custom, responsive web applications for clients, managing the full software development lifecycle from UI/UX design to backend deployment.
- Build high-performance interfaces using Next.js and Tailwind CSS, focusing on minimal, fluid micro-interactions and strict grid architectures.

Projects

FluxMedia | *Python, FastAPI, Redis, Celery, FFmpeg* Oct. 2026 – Present

- Architected a fault-tolerant, asynchronous media processing pipeline to decouple heavy CPU workloads from the main web server.
- Engineered a RESTful API with FastAPI to ingest large media files and dispatch processing tickets to a Redis message broker.
- Developed background Celery worker nodes to pull tasks and execute hardware-accelerated H.264 video compression utilizing macOS VideoToolbox.
- Built real-time status-tracking endpoints allowing Next.js frontends to poll continuous job states without blocking the event loop.

Loomo | *Python* Early 2026

- Developed a modular Python execution engine designed to automate complex generative media workflows.
- Configured isolated virtual environments and custom scripting to sequence AI generation tools, handling prompt parsing, output rendering, and file system management.

Profezr's Blog | *Next.js, FastAPI, Supabase* April 2026

- Engineered a responsive, full-stack educational web application dedicated to hosting and distributing academic materials for undergraduate students.
- Integrated secure authentication workflows and relational database models to manage user sessions, document metadata, and fast content retrieval.

Technical Skills

Languages: Python, JavaScript, TypeScript, C, C++, SQL, HTML/CSS
Backend & Infra: FastAPI, Redis, Celery, Django, Supabase, PostgreSQL, REST APIs
Frontend: Next.js (App Router), React, Tailwind CSS, Framer Motion
Tools & Systems: Linux, Git/GitHub, FFmpeg (VideoToolbox), Docker, Generative AI Workflows
